

Science Teacher

Trinity is seeking a full-time instructor in the Science Department for the 2018-19 school year. A BS in the natural sciences is required, with a strong chemistry emphasis preferred. Teaching experience is required.

The ideal candidate communicates to students a deep curiosity about science and inspires exploration into the core disciplines connecting students to real world applications. The instructor will teach chemistry to high school students at the advanced level, and preferably has experience with teaching chemistry in the International Baccalaureate Program. The teacher will develop student skills in scientific inquiry and laboratory practice as well as mastery of content. The teacher will actively use a variety of instructional strategies to engage students' critical thinking, including the innovative use of technology.

We anticipate growth in our technology department as well, so experience in any STEM area or computer science is preferred. An ability and interest in engaging students in mathematical modeling, design thinking, or coding is a plus.

Interested candidates should submit electronic copies of resume and cover letter to Lee Sprague, Head of Faculty Life, at lsprague@trinityes.org. Additionally, send (email or mail) copies of transcripts of all undergraduate and graduate coursework.

Trinity Episcopal School does not discriminate on the basis of race, color, religion, gender, sexual orientation, or national origin in the administration of its educational, admission or employment policies, scholarship and financial aid policies or any other programs administered by the school.
